

Vista Star Internet Programming

1. The first step that we need is a destination reading list.
2. A company can fax, email, or contact us by phone so we may receive your specific needs and destinations. (Make sure to include a returning e-mail that we may use.)
 - Fax: (248) 623-2930
 - Email: kirk@transignllc.net
 - Phone: (248) 623-6400 or (248) 420-7983 contact Kirk Fields
3. We would then take the information given to us and create a program out of your reading list.
4. This program would then be sent to your e-mail address that may then be downloaded straight to your USB Drive.
5. Follow these instructions for saving your destination list onto your USB Drive.
 - a. First you would plug your USB Drive into your computer.
 - b. You would then open the email we sent and attempt to open the attachments.
 - c. This is done by right clicking your mouse over the attachment and selecting "save target as..." or by single clicking the left mouse button on the attachment and clicking the "save" option.
 - d. Once this is done you should be prompt to name your file and select a destination on your computer to store the information.
 - e. *Be sure to keep the file name the same as the way we sent it (panela, panelb, and/or panelc) making changes to this will not allow this process to work.
 - f. If there is no demand for a backup file to be located on the computer, then you may simply save the destinations directly onto your USB Drive.
 - g. If at first you were to save the destinations on your computer then you would simply copy these files onto the USB Drive.
6. Once you have the information on your USB Drive you would then proceed to the instructions given in the "Programming and Operating Signs" manual which your company received. Both a paper copy and a hard copy located on the data CD were sent.
